EXPERIENCE

Full Stack Developer Intern, Eduville, Singapore **May 2025 - Aug 2025**

- Engineered a 3D avatar customisation screen leveraging React, TypeScript, Tailwind CSS, and Three.js, offering a wide range of colours and choices to increase user interactivity and experience.
- Optimised backend functionality and API endpoints utilising Typescript, efficiently retrieving data from AWS and databases for a seamless user experience.
- Formulated and implemented MongoDB collections to support dynamic data storage and retrieval for over 1000 projected users.
- Integrated React with Unity WebGL to enable seamless communication, facilitating real-time data exchange for dynamic questions in the game.

Freelance Developer, Terresquall, Singapore **Sep 2024 - Dec 2024**

- Designed and built WordPress webpages with Elementor and CSS for three client projects, including NDCA and NICA.
- Iterated websites to meet client requirements by implementing design updates and suggestions, including layout changes, to enhance user reading experience.
- Optimised client images for WordPress sites by resizing, compressing, and re-naming them in the proper format to improve load speed and enhance crawling and indexing by search engines.

Part-Time Instructor, Kodekoon, Singapore **Jul 2023 - Aug 2023**

- Ran coding workshops for 16 children, teaching the fundamentals of game development in Roblox Studio with the intention to introduce and spark interest in game development.

Developer Intern, Terresquall, Singapore **Mar 2022 - Aug 2022**

- Developed and deployed a password generator using HTML, CSS, and JavaScript on the Terresquall website to help users save time through the automation of secure and randomised password creation.
- Created 'Bounce Tales', a 2D platformer with physics-based mechanics in Unity, with the intention of developing a tutorial series of the game's development process.

- Edited and produced a 5-part video series for 'Bounce Tales' using DaVinci Resolve, and posted it on Terresquall's YouTube channel as a simple, easy-to-follow tutorial to guide viewers in making the game.
- Designed and customised webpages for three client companies with WordPress, Elementor, and CSS.

PROJECTS

Astra

Jan 2025 - Feb 2025

- Developed a Java-based task management chatbot for a Software Engineering module individual assignment, enabling users to track tasks more easily.

Programming Lead, Overclocked [Final Year Client Project]

Oct 2022 - Mar 2023

- Collaborated with a team of 6 to build a cross-platform VR and PC tower defence game, showcasing the client's plugin at Singapore Polytechnic graduation show.
- Created a grid system and other game managers to ensure the smooth integration of gameplay elements.

Programming Lead, Terminus [Studio Project]

Oct 2021 - Mar 2022

- Managed the programming development of a 3D tower defence game as part of a 6-person team, delegating tasks and coordinating with artists to ensure art assets were provided on time for milestones.
- Programmed AI behaviours for enemies and customisable level controls, allowing the game designer to easily adjust attributes during testing.

CO-CURRICULAR ACTIVITIES

Secretary (2021), Singapore Polytechnic Harmonica Orchestra, Singapore

May 2020 - Feb 2022

- Led orchestra practice sessions as a student conductor; and mentored four junior members to play the harmonica.
- Organised the CCA's participation in the 2022 Arts Fiesta as a member of the planning committee, managing logistics.
- Coordinated 2 volunteer events with FoodBank and Willing Hearts with the CCA committee.
